DIABETES MANAGEMENT

Providing quality team-based
managed care for our community

07 4150 1800

SugarRight Diabetes Management will provide care for complex or high-risk type 2 diabetic patients

Care will be delivered by:

- ✓ Advanced skill general practitioners in a general practice setting, under the supervision of an endocrinologist
- ✓ With the support of a diabetes nurse educator
- ✓ Podiatrist
- ✓ Optometrist
- ✓ Dietitian
- ✓ Exercise Physiologist
- ✓ Social Worker
- ✓ Psychologist

Patients initially undergo a comprehensive screening assessment by a diabetes nurse educator. This includes a review of:

- ✓ medications
- ✓ diabetic history
- ✓ foot assessment
- ✓ depression screening
- ✓ appropriate blood and urine testing

The multidisciplinary team will work on a management plan addressing:

- ✓ sugar level control
- ✓ blood pressure
- ✓ lipids (cholesterol)
- ✓ lifestyle
- ✓ diabetes complication management and patient priorities
